

PRIME NUMBERS

Prime Numbers is the first DAO, the first NFT project and the first game on XDC.

Our NFTs are prime numbers, everyone likes prime numbers.

WHAT IS PRIME NUMBERS?

- Prime Numbers is a DAO that generates funds for our community and students through NFTs and DEFI.
- However, it is much more than that. Ecosystems based on NFTs are coming online at an astonishing rate, Prime Numbers however is also incorporating a game where their NFTs have purpose.
- Prime Numbers has a revolutionary staking system in which you stake inside your NFTs to earn rewards.
- On top of this the NFTs will also generate royalty rewards and can be leveled up to increase the rewards.
- Prime Numbers is the first DAO, the first NFT project and the first game on XDC Network.

HOW IS THE STYLE AND HOW ARE THE NFTS PRODUCED?

Our NFTs are generative, which means each NFT is created by our code as a unique function of the particular inputs chosen. Expect a detailed explanation in a post soon! Also, the code will be available on github.

Prime Numbers has several collections of the NFTs. The first to come out will be those of prime numbers (generative and handmade).

Our collection consists of 4111 NFTs, of which 4096 are generative and 15 are handmade.

After this, Prime Numbers will reveal the 3D PFPs collection from one of the most prestigious artists on the world.

WHY HAVE WE CREATED PRIME NUMBERS?

- Education is important, but it's also very expensive. Students have always been challenged with paying tuition for their university studies. Many work hard to raise the needed funds, but COVID 19 has presented new challenges and paying for education has become more difficult than ever.
- Today, thanks to many collaborators, there is money coming into NFTs. Our goal is to help students who will be developing tomorrow's world.
- We have a unique goal and have created a unique platform to attain that goal. We are the first to build something of this kind on the XDC Network.

NFT & STAKING MECHANICS

Prime Numbers has a revolutionary staking system in which you stake inside your NFTs to earn rewards.

In order to earn various rewards with Prime Numbers, such as a portion of the NFT royalties, the NFT reward mechanism and ingame rewards, you will need to stake your \$PRNT tokens.

This does not happen in an ordinary way, however, when we stake at Prime Numbers, as we are an NFT project, we stake inside the NFTs.

Using NFT Royalty Standard, NFT holders will receive 50% percent of all royalties on resales. Since the royalties percentage is set at 10% this means 5% of the sales price of each sold NFT is distributed over all NFT holders. Your share depends on the multiplier of your NFT which is based on both its level and its rarity.

WILL THE PRICES OF THE NFTS BE DIFFERENT?

The price of the NFTs will change on the secondary markets depending on their rarity and level.

Rarities (Base Multiplier):

- ✓ Plentiful = 0.3
- ✓ Common = 0.4
- ✓ Uncommon = 0.5
- ✓ Rare = 0.7

- ✓ Epic = 0.9
- ✓ Legendary = 1.2
- ✓ Mythic = 1.5
- ✓ Godly = 1.9

TOKEN USE CASES

You can always speculate on the value of the token, but if you want to hold it, you will have an advantage:

Staking

DAO Governance

Game token
(The token is used
in the game)

PRIME NUMBERS TOKEN (\$PRNT)

RAISE

TYPE	Amount of \$PRNT	Price	Raise	Unlocks
Seed Sale	120,000	1\$ = 3 \$PRNT	\$40,000	33% at TGE. 33% Quarterly
Private Sale	480,000	1\$ = 1 \$PRNT	\$480,000	50% at TGE. 50% Quarterly
Pre-Sale	300,000	38-45XDC = 1 \$PRNT	11400000 XDC*	100% at TGE.

WHAT WILL BE THE MAIN NETWORK OF THE TOKEN?

For the development of our project, we have chosen XDC. We have made this choice due to the excellent relationship with the team and its many advantages over other networks.

WHY XDC NETWORK?

We chose XDC network for its great power, low transaction cost, and speed.

In addition, XDC has an excellent community and staff members.

COMPARISON CRITERIA	1ST GENERATION	2ND GENERATION	3RD GENERATION
	 Bitcoin BTC	 Ethereum ETH	 XinFin XDC
TRANSACTIONS PER SECOND	3-6 TPS	12-16 TPS	2000+ TPS
AVERAGE FEE	\$15 USD	\$10 USD	\$0.00001 USD
TRANSACTION CONFIRMATION	10-60 MINUTES	10-20 SECONDS	2 SECONDS (w/finality)
SMART CONTRACT SUPPORT	NO	YES	YES
ENERGY CONSUMPTION	71.12 TWh	20.61 TWh	0.0000074 TWh

TEAM

ARTURO
CANTERA

ARTURO

Extensive experience in crypto. 4th year software engineering student at Complutense University of Madrid.

DANIEL DE
WITTE

ADVISOR

CTO at WorkX. Rotterdam University of Applied Sciences.

XABIER
IGLESIAS

ADVISOR

Founder of Non Fungible Trends Marketing Agency, specialized in Marketing and Communication strategies for the Crypto and NFT scene.

ALBERTO
SERRANO

CMO & CM

Marketing and relationships at URJC. Five years of experience in start-ups.

OLATZ
DÍAZ

ART DIRECTOR

Artist born in the Basque Country. Degree in Advertising and Public Relations with a major in Creativity and Design.
